

ARMORY MINING ADDS TOM CLARKE, P.GEO TO ITS ADVISORY COMMITTEE

Vancouver, B.C. - November 27, 2025 - Armory Mining Corp. (CSE: ARMY) (OTC: RMRYF) (FRA: 2JS) (the "Company" or "Armory") a resource exploration company focused on the discovery and development of minerals critical to the energy, security and defense sectors, is pleased to announce the addition of geologist Tom Clarke to its Advisory Committee.

Mr. Clarke is a professionally registered geoscientist in Alberta and South Africa making him a Qualified Person as defined by NI 43-101. He completed a Master of Science degree by dissertation from the University of the Witwatersrand in Johannesburg as an international student. Mr. Clarke has been a Director of public companies since 2011. Mr. Clarke also formed two private companies. These entities acquired an old mine and Canadian mineral claims. These assets were then sold to public companies to the benefit of shareholders.

Thomas has 21 years of experience as a geologist working on gold, platinum group metals and base metal projects in North America, Africa, South America and Russia. When a Director of Bonterra Resources, he coordinated all exploration which led to the definition of the first NI 43-101 compliant resource on the Gladiator gold deposit by Snowden.

Thomas is also credited with identifying a marker at a palladium project in Russia which defined the target. Recently, Mr. Clarke supervised the discovery of a lithium-in-clay project in Arizona. Most recently, he identified the seemingly untapped hydrogen potential of the Western Canadian Sedimentary Basin and pivoted a company into the basin. Mr. Clarke has comprehensive experience in oil and gas by drilling one hundred lateral wells, often multi laterals as a well-site geologist. He has drilled wells focusing on many pools and formations from sites in northeastern British Columbia, Alberta and western Saskatchewan.

"We're pleased to add Tom to our advisory committee," said Alex Klenman, CEO. "His expertise will assist greatly in evaluating potential acquisitions and in designing and implementing efficient and impactful exploration programs," continued Mr. Klenman.

Armory Joins CMI

The Company is also pleased to announce it has become a member of the Critical Minerals Institute. The CMI is a global organization committed to addressing the challenges and opportunities within the critical minerals sector. CMI equips businesses, governments, and stakeholders with comprehensive resources, offering deep insights into the value, sustainability, and strategic significance of critical materials essential for technological and industrial advancement.

CMI serves as a central hub connecting companies, capital markets, and experts in the critical minerals industry.

The institute emphasizes education, collaboration, and thought leadership and also facilitates robust networking opportunities such as conferences and summits, helping members drive innovation and build resilient supply chains in a rapidly evolving global marketplace.
